KOORSIYE BOCHORA

FULL STACK WEB DEVELOPER | SOFTWARE ENGINEER

Bishoftu, Oromia, Ethiopia | +251 972 891 671
bkorsiye@gmail.com
Portfolio: korsiye-bochora.vercel.app
GitHub: github.com/Korsiyee
LinkedIn: linkedin.com/in/korsiye-bochora-980b2b3a9

PROFESSIONAL SUMMARY

Full Stack Web Developer and fifth-year Software Engineering student at Haramaya University, with hands-on experience designing, developing, and deploying responsive web applications. Works across front-end interfaces and back-end services using React, JavaScript, Node.js, Python, and MongoDB. Focused on building reliable, user-centered products, integrating APIs, and applying sound software engineering practices from implementation through deployment.

TECHNICAL SKILLS

Front End	HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Vite, Tailwind CSS, Bootstrap, Material UI, responsive design, accessibility, Figma
Back End	Node.js, Express.js, Python, Flask, RESTful APIs, JSON, JWT authentication, OAuth, session management, EmailJS integration
Databases & Cloud	MongoDB, MySQL (basic), Firebase, Vercel, Netlify, Render, Heroku
Machine Learning	NLP, text classification, data preprocessing, Scikit-learn, TensorFlow (basic), Pandas, NumPy
Tools & Practices	Git, GitHub, VS Code, Postman, Chrome DevTools, npm, Webpack (basic), basic unit testing, Agile, problem solving, algorithm design

PROFESSIONAL EXPERIENCE

Full Stack Developer | Freelance

January 2023 – Present

- Developed and deployed 6+ full-stack web applications using React, Node.js, and MongoDB.
- Built responsive interfaces and integrated REST APIs, third-party services, EmailJS, and authentication features.
- Worked with collaborators to deliver project milestones and improve application usability and performance.
- Applied front-end and back-end practices across the delivery lifecycle, from implementation to deployment.

Software Development Intern | FDRE MESOB HRMS

June 2024 – August 2024

- Contributed to development of a Human Resource Management System.
- Implemented employee record management features using the MERN stack.
- Assisted with database schema design and optimization for efficient data retrieval.
- Collaborated with senior developers and followed team coding standards.

EDUCATION

Bachelor of Science in Software Engineering — Haramaya University, Harar, Ethiopia
Fifth-year student | Expected graduation: July 2027
Focus areas: Web Development, Software Architecture, Database Systems, and Machine Learning.

KOORSIYE BOCHORA

PROJECTS, CERTIFICATIONS & ADDITIONAL INFORMATION

FEATURED PROJECTS

FDRE MESOB HRMS | Human Resource Management System

Technologies: React, Node.js, Express, MongoDB, Tailwind CSS

• Contributed to an HRMS for the Federal Democratic Republic of Ethiopia, supporting employee and organizational information management.

• Project scope includes employee records, payroll workflows, role-based access control, authentication, and reporting.

• Designed with a scalable architecture intended to support large volumes of user records.

Live application | GitHub repository

Apple Website Clone | Responsive UI/UX

Technologies: HTML5, CSS3, JavaScript, React

• Recreated key Apple website layouts with attention to visual detail, responsive behavior, and modern UI principles.

• Implemented smooth animations and transitions to improve the browsing experience.

Live application | GitHub repository

BBC News Classifier | NLP & Machine Learning

Technologies: Python, NLP, Scikit-learn, Flask, TensorFlow

• Built a text classification application that categorizes BBC news articles into topics.

• Applied TF-IDF vectorization and machine learning techniques; reported classification accuracy is 92%.

• Provided a Flask-backed interface/API for submitting text and receiving predictions.

Live application | GitHub repository

Nokia Snake Game | Browser Game

Technologies: JavaScript, HTML5 Canvas, CSS3

• Developed a browser-based version of the classic Snake game with movement, collision detection, and score tracking.

• Includes difficulty levels and local storage functionality.

GitHub repository

SuccessBridge Platform | Educational Management System

Technologies: React, Node.js, Express, MongoDB

• In-development platform concept for connecting students, teachers, and parents.

• Planned capabilities include academic progress tracking, attendance management, communication, and notifications.

CERTIFICATIONS & RECOGNITION

• **Full Stack Web Development** — Udemy, 2024. MERN stack training covering authentication, deployment, and development practices.

• **AWS AI Practitioner Challenge** — AWS, 2026. Completion of AI and cloud computing fundamentals challenge.

• **Leadership Excellence Award** — 2026.

LANGUAGES

English: Professional working proficiency | **Amharic:** Native/bilingual | **Afaan Oromoo:** Native/bilingual

PROFESSIONAL INTERESTS

Open-source development, technology learning and content creation, mentoring and knowledge sharing, and algorithmic problem solving.

PROFESSIONAL PROFILE

Interested in full-stack development opportunities, collaborative software projects, and roles where I can contribute to building useful digital products while continuing to grow as a software engineer. For professional inquiries, please use the email, phone, or profile links listed on page one.
